[Make a powerful public impression with Onstream Webinars.](#)

If you're looking for a full-service, innovative and cost-effective webinar solution, consider Onstream Media. Onstream Webinars is a professional grade web-based communications platform that leap frogs the competition in terms of features, functionality and value.

As any webinar organizer knows, much of the work lies in sending invitations, collecting registrations, emailing reminders, recording the session and distributing follow-up communications. Onstream Webinars puts you in control of the entire process – simply and cost effectively.

Webinars can improve productivity and save on travel costs by presenting your information in a highly interactive, customized environment. Securely share confidential documents, your desktop and applications with desktop and mobile users globally.

Onstream Webinars are ideal for lead generation, thought-leadership events, product announcements, PR and analyst relations, sales demonstrations and training with remote team members.

This cloud-based service will allow you to enhance your interactions with customers, prospects and colleagues and receive a considerable return on investment.

ONSTREAM WEBINARS OVERVIEW

KEY BENEFITS

Easy to Use – Onstream Webinars are easy to use for both hosts and participants. The simple, intuitive interface makes starting and conducting a webinar easy – all that is needed is a web browser to join. No additional software is necessary.

Accessible – Share your webcam, video clips, documents and whiteboard with participants, whether they are sitting at a desktop computer or on the go with a mobile device.

Cost Effective – Conduct as many meetings as you like for one low, monthly rate – regardless of duration or frequency.

Secure – All sessions include end-to-end, 128-bit encryption. Additional security features, such as unique participant links and password protection, can be enabled if desired.

Cloud-based – Easily set up and manage your webinars in the cloud. No hardware or software pre-installation, training or configuration is required.

SUPERIOR SERVICE

Infinite Conferencing has an expert team of professionals who are available by phone 24/7 for service and support. For more complex events, our team can assist with every facet of your webinar – from preparation to management – so you can focus on your content.

Through our tight integrations with our premiere partners, we offer the highest levels of resiliency possible to ensure service continuity, scale, privacy and security.

LIVE AND ON-DEMAND AUDIO AND VIDEO WEBCASTS

Scale up with Onstream's VisualWebcaster, which lets you conduct webcasts with advanced features to an unlimited audience on their desktops or mobile devices to ensure a positive experience.
